EXPERIENCE

JUNIOR SOFTWARE ENGINEER | CENTILI

OCT 2019 – PRESENT

SOFTWARE ENGINEER INTERN

AUG 2019 – OCT 2019

I've worked on implementing a [...] as a part of the core engine team.

Rest of the description will go here sometime.

Lorem ipsum

WIKI AMBASSADOR | WIKIMEDIA SERBIA

DEC 2018 – PRESENT

As a student Wiki ambassador, I've worked with other Wikimedia volunteers, established new partnerships between Wikimedia Serbia and teachers and professors, envisioned student projects which contribute to Wikipedia and Wikidata, hosted workshops, and overseen and assisted in students' work.

LECTURER | COMPUTER SCIENCE WEEK AT MG

2018, 2019,

I've participated in entrance test design and held a lecture as a part of Computer Science Week at Mathematical Grammar School in Belgrade. For the purpose of the lecture, I've built a [web app](#) using R's Shiny framework.

PROJECTS

STORIES | ANDROID APP

App for creating, sharing and playing choose-your-adventure stories. I've designed a domain-specific language for storytelling aimed at novice programmers and a platform-agnostic interpreter, implemented as a part of an Android app. App features include a code editor, visual story editor and a marketplace for users' stories. It was awarded Special prize for innovativity at Telekom Srbija Regional App Challenge.

NOTEKEEPER | ANDROID APP

Productivity app aimed at students, designed for collecting and sharing notes, questions and multimedia content among large groups. The app was awarded 2nd prize at Sixth mt:s App competition.

UPIS SUITE | DESKTOP & WEB APPS

Three apps designed to work together in order to collect and interpret data about Serbian primary schools. They can be used to scrape students' grades and graduation exam results, build a PostgreSQL database, simulate enrolment process with custom rules, plot data using a SQL-like language or a point-and-click interface. Data is freely available on my GitHub.

My other projects are hosted on [GitHub](#) and showcased on my [website](#).

EDUCATION

Faculty of Mathematics

University of Belgrade

Bachelor studies of Informatics, 2018 -

Mathematical Grammar School

Belgrade

2014 - 2018

Graduated with a 5.0 (/5) grade; my graduation [thesis](#) on data scraping was selected as one of the best in school year 2017/2018.

Petnica Summer Institute

Machine learning, 2019

I've participated in a summer school on machine learning, organized by Microsoft and Petnica SC. I've participated in lectures and workshops and worked on a project using generative adversarial networks.

Petnica Science Center

Psychology programmes, 2017 - 2018

I've taken part in various lectures and workshops. I've also carried out my own research about the role of emoticons and emojis in nonverbal irony, presented at the annual "Step Into Science" conference and to be published in Petnica Papers.

TECH STACK

Core: Java, Android, C, Git, Spring

Occasional: Play! Framework, PostgreSQL, R, Python, Bash, Prolog, nginx

COMPETITIONS

 **Telekom Srbija Regional App Challenge** (2018)

Special prize for innovativity

 **MathHackathon** (2017)
Finalist (team)

 **RAFChallenge** (2017)
Finalist

 **mt:s App Competition** (2016)
2nd prize

 **mt:s App Competition** (2015)
2nd prize
